

Presentatör:
Parham Berenjian

Bakgrund

- Jason Miller
- Codepen.com
- Release 2015

För- & nackdelar

Fördelar:

- + Lättviktigt
- + Snabbt och effektivt
- + Enkla API
- + Likt React

Nackdelar:

- Liten community
- Dålig dokumentation
- Begränsad funktionalitet

Preact & React

- Storlek på API
- Snarlik kod
- Intention av användning

Tankar & reflektioner

```
1 export default function FrameworkRow(props) {
2   normalizeSurvey(props);
3   return (
4     <tr className="frameworkRow" data-cy="chart-row">
5       <td style={{color: props.framework.color}} data-cy="chart-cell">{props.framework.name}</td>
6       <div className="line" style={{borderColor: props.framework.color}} data-cy="row-line"></div>
7       {props.framework.surveys.map((survey) => (
8         <div>
9           {survey.retention !== "" ? (
10             <td data-cy="chart-cell">
11               <div className="circle" style={{borderColor: props.framework.color}} data-cy="chart-circle">
12                 {survey.retention + "%"}
13               </div>
14             </td>
15             : (
16               <td className="empty-cell" data-cy="chart-cell"></td>
17             )}
18           </div>
19         )}
20       <td style={{color: props.framework.color}} data-cy="chart-cell">{props.framework.name}</td>
21     </tr>
22   );
23 }
24
25 function normalizeSurvey(props) {
26   const missingYears = 7 - props.framework.surveys.length;
27
28   if(missingYears > 0) {
29     for ( let i = 0; i < missingYears; i++) {
30       props.framework.surveys.unshift( {retention: ""});
31     }
32   }
33 }
```
